

P-WAVE®

P-ECO AIR

30 day fragrance passive air freshener for all rooms

The P-Eco Air is designed to give out the maximum fragrance to all areas of the work place. It can be used in the washroom but also in corridors, lobbies, offices, and anywhere where those nasty smells can loiter. The clever design of the P-Eco Air allows the fragrance to be released consistently giving the area it's in a uniformed fragrance smell. It has been design to work in its own unit, but also can be used in other makes such as TC, Vectair, Ecolab, Kimberly-Clark and other fan assisted units. It cannot break or spill and is recyclable. P-Eco Air is another get idea from the P-wave range.

- Highly fragranced
- Out performs Gels, wicks and aerosols
- Cannot break or spill
- Recyclable
- Fits other similar units
- 4 fragrances
